AMENDMENTS TO THE ABSTRACT OF DISCLOSURE

Please amend the Abstract of the Disclosure as follows:

ABSTRACT OF THE DISCLOSURE

~~The invention concerns a~~ A turbomachine (100) ~~comprising~~ includes a casing (102), a rotor (4), and a plurality of cooled ring segments (108) installed between the casing and the rotor, each ring segment containing a main cooling cavity (162) and being attached to the casing by ~~means of~~ a fastening device (132). ~~According to the invention, the~~ The fastening device (132) ~~comprises~~ can include a clamping screw (134) positioned more or less radially and pinning the ring segment against the casing. The clamping screw (134) is crossed through by a cooling airway (174) that communicates with the main cooling cavity (162) of the ring segment.
